

CME Session 12

Dosimetry Committee

Tuesday, October 22, 16:45 - 18:15

Session Title

Dose Response - How Far Have We Come?

Chairpersons

Marta Cremonesi (Milano, Italy)

Mattias Sandstrom (Uppsala, Sweden)

Programme

16:45 - 17:05 **Erik Verburg** (Rotterdam, Netherlands):

How does individualization of benign thyroid therapy with ¹³¹I improve treatment?

17:05 - 17:25 **Hugo Levillain** (Brussels, Belgium):

Lessons and improvements from dosimetry based ⁹⁰Y-SIRT treatments

17:25 - 17:50 **Katarina Sjögren-Gleisner** (Lund, Sweden):

Improvements in PRRT of neuroendocrine tumours due to dosimetry based treatments.

17:50 - 18:15 **Steffie Peters** (Nijmegen, Netherlands):

How can dosimetry help in PRRT treatments?

Educational Objectives

1. Possible treatment improvements with help of dosimetry
2. Possible improved treatment results
3. Possible reduction of toxicity in treatments

Summary

Treatment improvements with help of dosimetry

Key Words

Dosimetry; Toxicity and Treatment results
