

## CTE Session 2

Technologist Committee

**Sunday, October 20, 09:45 - 11:15**

Session Title:

**Whole Body Multimodality Imaging**

### Chairpersons

**Paolo Turco** (Padova, Italy)

**Andrea Santos** (Lisbon, Portugal)

### Programme

09:45 - 10:15 **Fabian Hoek** (Bonheiden, Belgium): SPECT/CT - A modern dinosaur?

10:15 - 10:45 **Valentina Mautone** (Meldola (FC), Italy): PET/CT - An overview today and tomorrow

10:45 - 11:15 **Sofia Kvernby** (Uppsala, Sweden): PET/MR - A wide view

### Educational Objectives

1. Provide indication and practice for SPECT/CT.
2. Provide indication and practice for PET/CT.
3. Provide indication and practice for PET/MR.
4. Provide inside into the latest developments in each respective practice.

### Summary

Continuous Technologist Education 2 (CTE2) will provide an overview of the most common practices within multimodality imaging. In today's climate, there is a lot of talk about the latest developments and what new discoveries are going to revolutionize nuclear medicine in the coming years and decades, however, let's not forget where we are and what most professions in NM face on a day to day basis. This session promises to provide a little something to people of all levels of experience working in nuclear medicine imaging.

### Key Words

Whole Body; Multimodality; SPECT; PET; CT; MR
