

Learn & Improve Professional Skills Session 2

Neuroimaging Committee

Sunday, October 20, 2024, 09:45 - 11:15

Session Title

Clinicians' Expectations for Neurological PET Imaging... ?

Chairpersons

Diego Cecchin (Padova, Italy)

Programme

09:45 - 10:15 **Silvia Morbelli** (Turin, Italy): ...in neurodegenerative disorders

10:15 - 10:45 **Tatjana Weidinger** (Vienna, Austria): ...in epilepsy

10:45 - 11:15 **Antoine Verger** (Nancy, France): ...in neurooncology

Educational Objectives

1. Understanding what clinicians expect from the nuclear medicine physician regarding neurodegenerative diseases, epilepsy and neurooncology
2. Understanding how to effectively respond to the clinical questions posed

Summary

In each of the three areas of nuclear neurology (neuro-degeneration, neuro-oncology, and epilepsy) addressed in this LIPS session, the speakers will aim to highlight what clinicians expect from the nuclear physician, what questions they pose, and what answers they anticipate in order to enhance professional skills with practical examples and references to major international guidelines

Key Words

CZT detectors; SPECT; performances; quantification; dosimetry
